

I'm an XM radio Listener and I would ask that you leave XM alone. The news and traffic available is the best you can get and helps improve interstate commerce. I think that if local radio could provide as good of information they would have done it a long time ago. But the NAB and its members are just mad because they cannot force us to listen to their commercials and collect a profit for giving slow and most of the time outdated information. I would like you to reject nab's petition # 04-160...

I would like to add that if the position is granted I would like to be first on the class action lawsuit filed for Detention time spent in traffic that could have been avoided had XM been allowed to give that service. I would hate to think of the liability that NAB is opening you up for....
